WHEELING, WEST VIRGINIA

WILSON'S WOOD MANTELS

1915 .. 1916

TO OUR CUSTOMERS—OLD AND NEW

IN distributing this Catalogue to the trade, we are confident that our designs for the coming season are the most attractive and carefully selected of any that have been offered in recent years either by ourselves or our competitors.

The location of our Factory gives us the advantage of low manufacturing cost, which combined with the large quantity of each design turned out, enable us to guarantee our customers the lowest prices consistent with good workmanship and the selection of proper material.

All of our Mantels, from the cheapest Base to the highest priced Cabinet, are made from carefully selected, well seasoned lumber, by skilled workmen, from approved and architecturally correct designs.

We again call attention to the Finish of our Mantels which has always been one of our specialties. The gloss finish of the cheaper designs has long been recognized as a standard of quality and the polished finish of our better grades is unsurpassed.

All stock Oak Mantels are finished in Golden Oak, and this popular shade will always be sent unless we are advised to the contrary. While we can match any sample of finish submitted, any departure from regular stock will entail a delay of several weeks. Any variation from regular stock sizes or designs will also cause delay. Please note the sizes and descriptions under each cut and endeavor to order accordingly to facilitate prompt service.

We do not consider it a good policy to quote high list prices on our Mantels, and then name large discounts, which are often misleading and frequently misunderstood; hence our Price List—sent with each catalogue—names net prices on every Mantel, (by number and page) and also gives approximate shipping weight. This list also quotes tile per set for the various openings given under cut of each mantel, and fireplace fixture as shown in supplement.

All prices quoted this season are F. O. B. Wheeling, instead of freight allowed as formerly, but in making quotations we always advise the rate of freight to your station, and as the weights are given in the price list you can easily figure the cost of transportation.

By our former method of quoting on a delivered basis, it was necessary, for our own protection, to estimate on an average rate of freight, thereby working a hardship on many of our customers whose freight rate was low, and on other occasions, causing a loss to ourselves on shipments to points where the rates were excessive.

TILES

Our stock of Tiles for hearths and facings is complete in every detail. Where the selection of colors is left to our judgment we send the shades best suited to the mantels ordered, or if desired we will send samples showing many colors and combinations.

Where skilled workmen are not obtainable to set tile we will slab the facing in three sections so that anyone can set same in place, and will at all times, when requested, furnish full and explicit directions in regard to setting tile.

We also carry a full assortment of wall and floor tile for all purposes. Send us a diagram of your work with sizes marked and we will be glad to submit colored sketches and estimate of cost.

FIREPLACE FIXTURES

All of the Burners, Gas-log outfits, etc., shown in this catalogue are designs which we can furnish promptly from stock, and we also send with our price-list a supplementary folder, showing a number of other patterns.

Our old customers are guaranteed better and quicker service this year than we have ever been able to offer them in the past, and we respectfully solicit a trial order from any new trade into whose hands this book may fall with the assurance that one order will place their names among our regular customers in the future.

Very truly yours,

W. A. WILSON & SONS,

Wheeling, W. Va.

Mantel and Tile Department.
